One Anastomosis Gastric Bypass Performed with a 150-cm Biliopancreatic Limb Delivers Weight Loss Outcomes Similar to Those with a 200-cm Biliopancreatic Limb at 18-24 Months

[Article](#) [Full-text available](#)

Apr 2020

Maureen Boyle · Kamal Mahawar

Background It has been suggested that shortening the biliopancreatic limb (BPL) length with one anastomosis gastric bypass (OAGB) to 150 cm would reduce the revision rates for malnutrition. But, it remains unclear if this would not compromise the efficacy of this procedure. **Methods** We examined our prospectively maintained database to compare the o...

The first consensus statement on revisional bariatric surgery using a modified Delphi approach

[Article](#) [Full-text available](#)

Apr 2020

Kamal Mahawar · Jacques Himpens · Scott A Shikora · [...] · Peter K Small

Background Revisional bariatric surgery (RBS) constitutes a possible solution for patients who experience an inadequate response following bariatric surgery or significant weight regain following an initial satisfactory response. This paper reports results from the first modified Delphi consensus-building exercise on RBS. **Methods** We created a comm...

One Anastomosis Gastric Bypass in Patients with Gastroesophageal Reflux Disease and/or Hiatus Hernia

Article [Full-text available](#)

Jan 2021

Joseph Winstanley · Salman Ahmed · Michael Courtney · [...] · Kamal Mahawar

Introduction One anastomosis gastric bypass (OAGB) offers favourable weight loss outcomes and is associated with reduced morbidity and mortality when compared to other mainstream bariatric procedures. However, a randomised trial reported a conversion rate to roux-en-Y configuration (RYC) of 3.1%, and some surgeons consider the procedure unsuitable f...

Risks Associated with Sleeve Gastrectomy

Chapter

Jan 2021

Aparna Govil Bhasker · Kamal Mahawar

With approximately 46% of all bariatric operations performed across the world, Sleeve Gastrectomy (SG) is the most common bariatric operation until date. Though considered technically easier, the complications of SG can be devastating. Best outcomes are achieved when the complications are detected and treated early. There is a need for emphasis on...

Revisional Surgery: LSG to OAGB

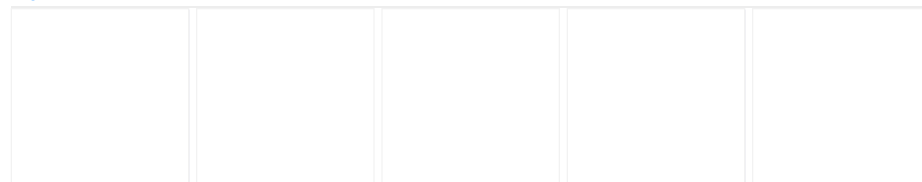

Chapter

Jan 2021

Michael Courtney · Kamal Mahawar

Laparoscopic Sleeve Gastrectomy (LSG) is the most commonly performed bariatric operation worldwide; this is not surprising given its shorter operating time and relative safety. Patients may experience early or late complications, de novo symptoms, worsening of pre-operative symptoms, inadequate weight loss, weight regain or unsatisfactory improve...

Bariatric surgery for patients with type 2 diabetes mellitus requiring insulin: Clinical outcome and cost-effectiveness analyses

Article [Full-text available](#)

Dec 2020

Emma Rose · Mcglone Id · Iain Carey Id · [...] · Omar A Khanid

Background Although bariatric surgery is well established as an effective treatment for patients with obesity and type 2 diabetes mellitus (T2DM), there exists reluctance to increase its availability for patients with severe T2DM. The aims of this study were to examine the impact of bariatric surgery on T2DM resolution in patients with obesity and...
